

Experience of PSA5 pipe stress analysis models. Previously involved in the modification and validation of DNB main steam PSA5 models. Following an investigation into the actual observed behaviour on plant (from historical hanger survey results), which highlighted the north/back quadrant pipework movement was not comparable with the predicted PSA5 model behaviour. Knowledge obtained of hanger hysteresis effects and a method of applying this effect to the PSA5 model, in order to alter the movements to replicate more closely the actual behaviour on plant. More recently commenced work creating new and modifying PSA5 models of the decay heat systems at Hunterston B. Verifier of the DNB Engineering Tier 2, which is part of the component life assessment (CLA) process used to monitor and review the accumulated creep and fatigue damage of boiler and other reactor internal components from all significant plant operations.

Retail Store Manager

July 2008 - June 2012

All Saints, Trafford Centre, Manchester

Retail Area Manager

November 2006 - April 2008

Morgan De Toi, North of England

Retail Operations Manager

July 2006 - November 2006

River Island, Manchester

Retail Senior Manager

June 2001 - July 2006

Morgan De Toi, Trafford Centre, Manchester

Responsible for the annual sales turnover and team of staff. The role involved creating a sales focused environment, maximising sales through effective stock management and commercial visual merchandising.
